# Profile Summary

Results-driven Full Stack Developer with over 5 years of experience in designing, developing, and implementing innovative web applications. Proficient in both front-end and back-end technologies, including HTML, CSS, JavaScript, Node.js, and Python. Demonstrated expertise in creating responsive, user-friendly interfaces and robust server-side components. Passionate about delivering high-quality code and optimizing performance. Adept at collaborating with cross-functional teams to drive project success. Eager to contribute technical skills and creativity to enhance user experience and achieve business objectives.

## Diploma in IT

Branch: software

Institute/School: Islamic azad university

Qaemshahr, Mazandaran, Iran

2021 - Present

## Work Experience

## **FullStack Developer**

Knowledge based company Namira Yarsan Vista

Sari, Mazandaran, Iran

December 2021 - December 2022

#### Tasks and Achievements

- Developed and maintained high-traffic web applications using React for front-end and Node.js for back-end, enhancing performance by 35%.
- Collaborated with cross-functional teams to design and implement RESTful APIs.
- Led the migration of legacy systems to modern frameworks resulting in a 50% reduction in server response times.
- Implemented responsive design principles, ensuring websites are mobile-friendly and accessible across various devices, increasing mobile traffic by 25%.

## Senior Front-End Developer

Caspian niavaran sari

Sari, Mazandaran, Iran

April 2023 - July 2024

#### Tasks and Achievements

- Led the development of a responsive and accessible user interface for a high-traffic e-commerce platform.
- Collaborated with UX/UI designers to implement design systems and component libraries.
- Optimized website performance by implementing code-splitting and lazy loading techniques, achieving a 40% reduction in page load time.
- Mentored junior developers in best practices for front-end development, leading to improved code quality and team efficiency.
- Integrated third-party APIs and services to enhance application functionality, driving a 50% increase in user interaction with new features.

#### mentor

MFT

Sari, Mazandaran, Iran

April 2024 - Present

#### Tasks and Achievements

## **FullStack Developer**

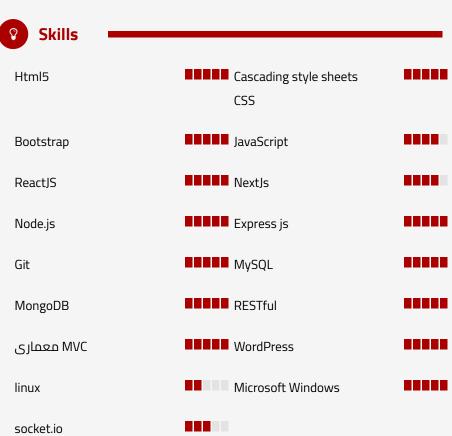

Fapna

Babol, Mazandaran, Iran

July 2024 - Present

#### Tasks and Achievements

• As a backend developer specializing in Node.js, Express, and MySQL, I have played a key role in designing and implementing critical components of banking systems. My responsibilities included developing and optimizing APIs to ensure seamless communication between services, managing large-scale databases for secure and efficient data handling, and enhancing system performance to handle high transaction volumes. I contributed to the integration of payment gateways, user authentication systems, and real-time financial reporting. Additionally, I collaborated with front-end teams and other stakeholders to deliver reliable, scalable, and secure solutions aligned with the company's goals.

## fapna

For: fapna July 2024

Banking System for Financial Institutions and Qard-ul-Hasanah Funds Design and development of a comprehensive banking system for Qard-ul-Hasanah Funds and small financial institutions, with the aim of digitizing financial processes, increasing transparency and reducing operational errors. The system includes account management, full lending and repayment cycles, accounting module, advanced financial reporting, multi-factor authentication and payment gateway connectivity.

The project is developed using Node.js for server-side logic and MySQL as the database, and benefits from a modular architecture and secure structure for user management and access leveling.

For: avash company

March 2025

Corporate Website Design for a Large Concentrate and Food Export Factory

Design and development of the official website of a large factory active in the field of concentrate and food products production, focusing on professional introduction of the brand, products and export capabilities. The factory operates in Iran and Turkey and exports its products to regional and international markets.

The website was launched with the aim of creating a professional online showcase to introduce capabilities, facilitate communication with foreign buyers, and enhance brand credibility in the export market.

Responsive design, multilingual content, introduction of the production line and product features were among the key parts of this project.

## personal website

For: Personality

Senior Backend Developer in the Employee Evaluation System Project – Islamic Azad University, Qaemshahr Branch

In this project, as a senior backend developer, I was responsible for designing, developing, and optimizing an internal system for evaluating the performance of university employees. The goal of developing this system was to create a coherent structure for continuous evaluation, analyzing performance data, and improving human resource productivity at the organizational level.

The project included designing scoring modules, dynamic evaluation forms, approval workflows, and generating analytical management reports. Also, with a focus on reliability, data security, and scalability, the system was developed in a way that meets the university's long-term needs in the field of human resource management.
